## **DETAILED INDEX**

*	Introduction 2
*	Features of Python 4
	1) Simple and Easy to Learn
	2) Freeware and Open Source
	3) High Level Programming Language
	4) Platform Independent
	5) Portability
	6) Dynamically Typed
	7) Both Procedure Oriented and Object Oriented
	8) Interpreted
	9) Extensible
	10) Embedded
	11) Extensive Library
<b>.</b>	Limitations of Python 5
*	Flavors of Python 6
	1) CPython
	2) Jython OR JPython
	3) IronPython
	4) PyPy
	5) RubyPython
	6) AnacondaPython
<b>*</b>	Python Versions 6
<b>*</b>	Identifiers 7

*	DATA TYPES 10
	1) int Data Type
	Decimal Form
	Binary Form
	Octal Form
	Hexa Decimal Form
	2) Float Data Type
	3) Complex Data Type
	4) bool Data Type
	5) str Data Type
	6) bytes Data Type
	7) bytearray Data Type
	8) List Data Type
	9) Tuple Data Type
	10) Range Data Type
	11) Set Data Type
	12) frozenset Data Type
	13) dict Data Type
	14) None Data Type
*	Base Conversions 12
*	Slicing of Strings 16
*	TYPE CASTING 18
	• int()
	• float()
	• complex()
	<ul><li>bool()</li></ul>
	• str()
*	Fundamental Data Types vs Immutability 21
*	·
*	Constants 31
2) OPER	ATORS 32
	1) Arithmetic Operators 33
	2) Relational Operators OR Comparison Operators 35
	3) Equality Operators 36

	4)	Logical Operators 37
	5)	Bitwise Oeprators
	6)	Shift Operators
	7)	Assignment operators
	8)	
	9)	<ul> <li>Special operators</li></ul>
	SA)	Operator Precedence 44
	_	Mathematical Functions (math Module)
	-	Command Line Arguments 50
	_	Output Statements
3) FLO		ONTROL 56
3) FLO		SONTROL 56  Conditional Statements 57
3) FLO		
3) FLO		Conditional Statements 57  • if  • if-elif
3) FLO		Conditional Statements 57  • if
3) FLO		Conditional Statements
3) FLO	S	Conditional Statements
3) FLO	S	Conditional Statements
3) FLO	S	Conditional Statements
3) FLO	S	Conditional Statements
3) FLO	S	Conditional Statements
3) FLO	S	Conditional Statements
3) FLO	S	Conditional Statements
3) FLO	\( \mathref{S} \)	Conditional Statements

\$	Difference between del and None 71
4) STRING	DATA TYPE 72
•	What is String?73
•	How to define multi-line String Literals? 73
•	How to Access Characters of a String? 74
	<ul> <li>Accessing Characters By using Index</li> </ul>
	<ul> <li>Accessing Characters by using Slice Operator</li> </ul>
•	Behaviour of Slice Operator 75
<b>③</b>	Slice Operator Case Study 76
•	Mathematical Operators for String 76
<b>③</b>	len() in-built Function 77
•	Checking Membership 78
•	Comparison of Strings 78
•	Removing Spaces from the String
•	Finding Substrings 79
<b>③</b>	Counting substring in the given String 81
•	Replacing a String with another String 82
•	Splitting of Strings 83
•	Joining of Strings 83
•	Changing Case of a String 84
•	Checking Starting and Ending Part of the String
•	To Check Type of Characters Present in a String 85
<b>③</b>	Formatting the Strings

	🛂 Important Pi	rograms regarding String Concept87
	1)	Program to Reverse the given String
	2)	Program to Reverse Order of Words
	3)	Program to Reverse Internal Content of each Word
	4)	Program to Print Characters at Odd Position and Even Position
		for the given String
	5)	Program to Merge Characters of 2 Strings into a Single String by
		taking Characters alternatively
	6)	Program to Sort the Characters of the String and First Alphabet
		Symbols followed by Numeric Values
	7)	Program for the following Requirement (Input: a4b3c2, Output: aaaabbbcc)
	8)	Program to perform the following Activity (Input: a4k3b2,
		Outpt: aeknbd)
	9)	Program to Remove Duplicate Characters from the given Input String
	10	) Program to find the Number of Occurrences of each Character
		present in the given String
	11	) Program to perform the following Task
		<ul><li>Input: 'one two three four five six seven'</li></ul>
		<ul> <li>Output: 'one owt three ruof five xis seven'</li> </ul>
		output one out time of the me all of the
